

# Mobile Application

## The Power of Zavanta® - Now Available on the Go

The Zavanta Mobile Application is a premium module that provides a reader experience centered around the Reader Dashboard, making document access simpler and easier for mobile devices.

Mobile App vs. Phone Browser		
	Zavanta Mobile App	Phone Web Browser (Chrome, Firefox, Edge, Safari)
Homepage	Mobile reader dashboard with search bar	Portal home page
Native Toolbar	Available on all pages	Not available
Access Zavanta	Automatic through app	Need URL address
Search	Always easy to access with mobile dashboard	Accessed on portal pages, if configured and found in different places
Notifications	Email and push notifications	Email notifications only
Login	Biometrics (only need to sign in once per device), SSO, username and password	SSO, username and password

# Zavanta Mobile Application Key Benefits

Zavanta's Mobile Application offers employees access to your company's Zavanta portal on their phone or tablet. Your team is using Zavanta for policy and procedure documentation – and now this is available at their fingertips, no matter where they are.

## Zavanta Premium Mobile App Features Include:

**Quick Access to Zavanta:** The power of Zavanta is now easily accessible wherever your employees are. A simple click to the Zavanta app offers readers the opportunity to find the documents they need, when they need them.

**Ongoing Login:** Biometrics can be used for a secure login. Employees can link either their Face ID or fingerprint to quickly log in to the Zavanta application on their mobile phone or tablet. Employees only need to log in once and from that point on Face ID or fingerprint will grant access to Zavanta to view their portal.

**Enhanced Mobile Dashboard:** Mobile Reader dashboard allows for users to quickly see favorites, recently viewed, documents that need to be read verified, checklists they need to complete, and document change subscriptions in one place that works well on the small mobile device.

**Easy Document Search:** Document search is made easy with the Mobile Reader Dashboard. With built-in, intuitive search, users are given highly relevant results so that they can find what they need fast.

**Read Verify:** With Zavanta's Read Verify feature, employees can sign off that they have read the content and understand it. Read Verify is integrated into the application, so employees can sign off on documentation while in the field.

**Checklists:** Checklists are integrated into your Zavanta Mobile Application, making it easy to access and use a checklist while on the job. Employees will know they have successfully completed tasks following best practices, boosting their confidence.

**Recently Viewed Documents:** Recently Viewed Documents feature allows employees to quickly access and review their most recent SOPs. This enhancement streamlines workflow by providing easy retrieval of important documents right at their fingertips.

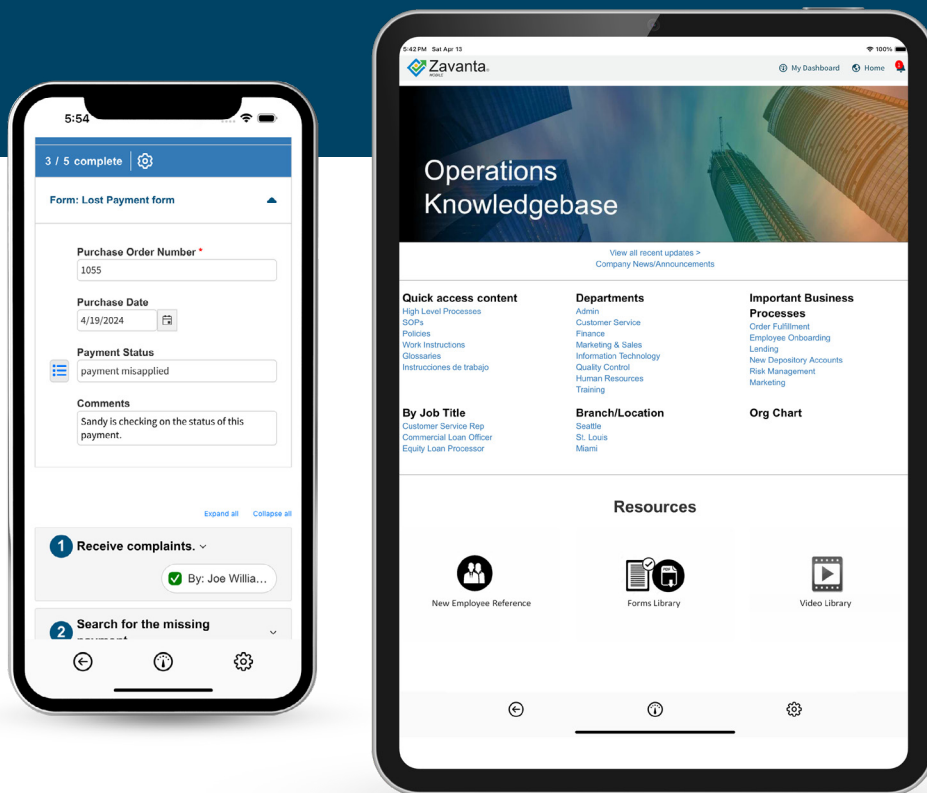

**Favorite Documents:** All favorite documents are readily available on the Mobile Reader Dashboard. This enhances efficiency by encouraging employees to easily organize and quickly retrieve key documents.

**Document Change Subscriptions:** Never miss an update with document change subscription notifications. This feature ensures employees stay informed about important changes, maintain compliance, and have access to up-to-date knowledge.

## Zavanta Mobile Application Key Benefits

- Easy access to the Power of Zavanta
- Optimized reader experience
- Easy, centralized search
